

Machining of engines block

ADEN REPAIR SHOP is the first repair shop in Yemen to make the machining of the engines blocks on site, with our high technology portable lathe machine we are able to make the machining for almost type of the engines blocks.

Our high qualified trained team is able to meet the customer requirements and do the machining according to the engine manufacturer recommendation.

The new solution for machining that our repair shop is providing to the customer; has save a lot of cost for our customers , now they can do the machining in site instead of sending the cylinder block to outside the country which is costly for the customer in transportation , repair and time

All the equipments that used for the machining and measurements are from trusted companies and gave a high accuracy machining measurements.
