**New high technology for Spray Coating system**

**ADEN REPAIR SHOP** was already use the spray coating system since early 2007 and now we have increase the quality and type range of coated material with the new generation of the spray coating system

The new process and system start to be in use in the repair shop now and the repair shop is ready to receive the customers' parts which are in need for repair.

The rotor shafts repair has been made successfully in our repair shop together under supervision of our partners **MESSER Eutectic Castolin Switzerland S.A.**

the Swiss company.

The spray coating in our repair shop is the 1<sup>st</sup> and only one in the territory and the nearby countries.

With the spray coating we offer many advantage to our customers started from protection against rust to repair the eroded and bended shafts and return them back to the Normal size and shape.
